-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Drawings

1. The drawings were received on Nov. 15, 2005. These drawings are approved.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10-13 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2003/0172553 (Truelsen).

Truelsen teaches a midsole assembly (1) having a body and a stiffer curved forefoot plate (16; see paragraph #25) in the forefoot portion of the midsole (see paragraph #32) including a flex groove (25) and side tabs (see figures 1 and 2 which show the plate 16 with four outer side tabs). The plate 16 is a curved plate as shown by figures 1 and 2, which show a plurality of different curved portions. The curves include at least one curve in the forefoot portion that has a concave shape (see the base of the fingers 18a, 18c along the outer portion of the plate). Moreover, the corrugations 25 are also concavely curved (see figure 5).

Allowable Subject Matter

4. Claims 14 and 15 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments, with regard to claims 10-13 and 16, filed Nov. 15, 2005 have been fully considered but they are not persuasive.

Applicant argues that "Truelsen does not teach or suggest a "midsole assembly for running sandal".

In response, the midsole assembly of Truelsen has the structure as claimed and therefore can inherently be used as a running sandal. Moreover, Truelsen was only referring to hiking shoes as one possible example of his invention.

Applicant argues that Truelsen doesn't teach a curved forefoot plate with a partially concave shape.

To the contrary, the plate 16 is a curved plate as shown by figures 1 and 2, which show a plurality of different curved portions. The curves include at least one curve in the forefoot portion that has a concave shape (see the base of the fingers 18a, 18c along the outer portion of the plate). Moreover, the corrugations 25 are also concavely curved (see figure 5).

Applicant's remarks to claim 16 are moot inasmuch as the claim has not been amended as stated in his remarks.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

7. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

-“The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references.”

--“A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.”

-Moreover, “The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims. Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06” MPEP 714.02. The “disclosure” includes the claims, the specification and the drawings.
